DETAILED ACTION

Status of the Application

- [1] Claims 44-50 and 121 are pending in the application.
- [2] Applicant's preliminary amendment to the claims, filed on 1/18/06, is acknowledged. This listing of the claims replaces all prior versions and listings of the claims.
- [3] Applicant's preliminary amendment to the abstract and specification, filed on 1/18/06, are acknowledged.

Lack of Unity

- [4] Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 44-50, drawn to the special technical feature of a method of screening a plurality of compounds for a ligand of a constitutive androstane receptor (CAR) polypeptide.

Group II, claim(s) 121, drawn to the special technical feature of a compound of formula A.

- [5] The technical feature linking the inventions of Groups I-II is Compound 1 (having formula A) as shown in claim 121. The inventions listed as Groups I-II do not relate to a

Art Unit: 1656

single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reason(s): According to PCT Rule 13.2 unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. The method of Group I shares no special technical feature with the compound of Group II as the method of Group I, e.g., claim 1, encompasses crystalline CAR polypeptides in complex with ligands other than Compound 1. As such, the inventions of Groups I-II do not have the shared same or corresponding special technical feature.

[6] Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

[7] Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Notice of Possible Rejoinder

[8] The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

Art Unit: 1656

All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
